Retrieving English legal status information from the Taiwan Patent Office's English website

1. Click here for a free patent search

NOTE: Legal status and transaction data for documents since 1950 are now also available in the English version! The information is generated by machine translation. The transaction data is updated in line with the publication frequency of the gazette; legal status is updated daily. However, the English source is updated monthly and abstracts are delayed for about 2 months. Consequently, in order to avoid gaps, it is still recommended to cross-check the legal status information with the Chinese version (see separate search guide).

NOTE: English abstracts are displayed together with the bibliographic information of laid-open publications (A documents). Links to machine-translated “transaction data” (gazette information) and “status” (pre-grant) are also provided. As before, “patent right change” (post-grant) is displayed with the bibliographic information of granted patents (B documents). Citations can also be found for granted patents published on or after 1 January 2008 (if available).
