EQE 2020 – second phase of pilot project for writing Papers A, B, C and D on a computer

Subsequent to the completion of the first phase of the pilot in which a small group of 15 volunteers tested the suitability of writing papers on a computer, preparations are now underway to expand the group to 80 in a second phase. The main objectives of the next phase will be to evaluate the suitability of software and whether the technical and logistical challenges can be met on a larger scale.

As in the first phase, candidates sitting all 4 papers for the first time and who are prepared to write at the Munich examination centre can be considered. Interested candidates fulfilling these criteria should contact the Examination Secretariat by e-mail by 15 September 2019 at the latest (helpdesk@eqe.org). If there are more volunteers than available places, candidates will be selected randomly.

The pilot group will type their answers in a secure environment using a text editor program consisting of basic editing features. All other rules and conditions pursuant to the EQE will apply to the pilot. More information about the equipment and software can be found in the "Technical User Manual".
